

2-3 December 2015

UK Cyber capability – Company Delegation to Finland – In partnership with HP

2-3 December 2015

UKTI are organising an exciting programme for a British business delegation to explore opportunities in the cyber and related security areas in Finland in partnership with HP Enterprise Security Services.

The visit will include a tailored invitation only seminar at the British Ambassador's Residence for a selected audience of Finnish Cyber industry companies, CIO's of potential client companies as well as government departments and officials.

Through the partnership with HP Finland the invitation list will consist of the CIO's of the leading companies in Finland. Additionally, support from HP can provide access to opportunities within larger development areas in both public and private cyber areas.

Why Finland:

- The Finnish home-grown Cyber capability is strong but too small to tackle all areas.
- Good presence of multinational companies with a HQ in Finland necessitates and provides wider reaching contacts.
- Government lead drive to develop and increase Finnish cyber capability necessitates international collaboration.

Please contact UKTI Helsinki for further information on this business delegation opportunity.

Delegation Information

- Tailored invitation only seminar at the British Ambassador's Residence
- Access to local decision makers and opportunity to present
- Delegation on-site visit
- Cost £ 500
